Postgraduate Certificate in Data Protection
Operational Excellence Course 2:

Data Protection Methodologies and Techniques

Embedding Data Protection by Design

Program starts in January 2023

Data Protection Methodologies and Techniques

Embedding Data Protection by Design

OVERVIEW

The number of countries developing and enforcing their own data privacy laws is growing. However, Data privacy and protection are more than just a law – Data Protection is a comprehensive set of techniques and frameworks that must be integrated with the company's day-to-day operations.

Although regulators have provided some guidance on how to implement privacy laws, many organizations still struggle with how to operationalize privacy principles. Many think of privacy as an afterthought. Thus, though many companies think they are compliant, they are still at high risk of suffering a breach. Thus, a good knowledge of Data Protection Techniques is necessary to cope with the large amount of data being handled by businesses today.

Respect for data privacy and protection will be essential to support the development of new products, solutions, and services addressing existing market needs and reaching consumers. Hence, operationalizing privacy must be proactively managed. Understanding the principles and requirements of Data Protection Impact Assessment / Privacy Impact Assessment is vital to embedding Data Protection by Design in processing personal data. The program will provide an overview of how to embed Data Protection by Design personal data processing in applications and systems.

The program is for Business leaders, Data Protection Officers, Information Security Officers, Compliance and Audit practitioners, Marketing professionals, and individuals in cross-functional teams who handle personal data. By joining the program, leaders and teams can learn data protection techniques that will enable them to maximize personal data's utility while reducing the risk of privacy breaches.

With effective cross-functional leaders, the company can more efficiently deploy solutions and foster more collaboration in addressing the growing issues related to protecting personal data.

PROGRAM OBJECTIVES

The course will enable students to gain a comprehensive understanding of several data protection techniques, including:

- Conducting a Data Protection Impact Assessment (DPIA) / Privacy Impact Assessment (PIA)
- Data Protection by Design
- Overview of selected privacy certifications, such as ISO and the Philippine Privacy Trustmark (PPTM)

This interactive online program also aims to expand the business perspective of cross-functional leaders, managers, and supervisors. It will teach the principles and framework of personal data governance within key functional areas like Sales, Marketing, Customer Service, Human Resources, and Operations to develop their cross-functional skills, knowledge, decision-making, and collaboration capabilities.

Postgraduate Certificate in Data Protection
Operational Excellence Courses

Course 1: [Data Protection Officer](#)

Course 2: [Data Protection Methodologies and Techniques](#)

Course 3: Mobile App Privacy by Design

Course 4: Digital Marketing and Privacy

Course 5: [Data Breach Response Management](#)

PROGRAM SCHEDULE

January 25, 26, 27, 30, 31, 2023

1:30 PM to 5:00 PM (GMT+08) on all dates

PROGRAM FORMAT

Delivered online via live virtual interactive sessions in Zoom

PROGRAM FEE

PHP 25,000.00 or USD 500.00*

SCHOOL OF EXECUTIVE EDUCATION
AND LIFELONG LEARNING

By joining the program, participants will also develop their understanding of cross-functional linkages in their organization and the different personal data processes and data processing tools for planning and executing cross-functional efforts. The program will enable them to explore innovative approaches to personal data governance to tasks and responsibilities and drive business growth with a cross-functional mindset

KEY BENEFITS

Well-Structured Program and World-Class Faculty

The online program offers a venue for high-impact learning with real-time, experiential, and interactive online sessions. The participants will learn from AIM's world-class faculty and its industry leaders and practitioners network.

Gain a Holistic Business Perspective and Deeper Understanding of Privacy and Data Protection

The program helps leaders, managers, supervisors, and individual contributors develop a broader business perspective and a deeper understanding of privacy and data protection linkages between key teams in an organization, such as Finance, Sales, Marketing, Customer Service, Human Resources, and Operations.

Enhanced Privacy and Data Protection Leadership and Personal Data Governance Skills

The program enhances the participants' capability to lead and manage in a cross-functional setting, improving performance, planning, collaboration, and execution of cross-functional efforts while embedding privacy and data protection in business processes.

Who Should Attend

Data Protection Officers, Compliance Managers, Risk Managers, Information Security Officers, and Individual Contributors who want to gain a broader understanding of privacy impact assessment, data protection impact assessment methodologies, principles, and DPA regulatory requirements in business, understand the linkages of personal data processing between key functional teams and improve their leadership and personal data governance skills in a cross-functional and collaborative setting.

Earning a SEELL Post-Graduate Certificate and Diploma

SEELL offers Post-Graduate Stackable Certificate Courses in various areas of concentration and discipline, which build an individual's qualifications and distinguish their professional value. It enables professionals to develop their proficiency in diverse areas of concentration in a personalized and more manageable manner.

By successfully completing SEELL's programs, credentials can be earned over time, stacked towards earning a Post-Graduate Certificate in an area of their choice, and, ultimately, a Post-Graduate Diploma in Management. This leads to more career opportunities, advancement, and potentially high-paying jobs.

EARNING CREDENTIALS

Successfully completing the program earns participants One (1) unit, which can be credited to the following:

- Post-Graduate Certificate in Operations Management
- Post-Graduate Certificate in Information Technology Management and Digital Transformation
- Post-Graduate Certificate in Data Protection Operational Excellence

**Post-Graduate Certificates require five (5) units earned within two (2) years.*

Participants will also earn one (1) unit, which can be credited to the Post-Graduate Diploma in Management.

**The Post-Graduate Diploma in Management requires a total of twenty (20) units earned within three (3) years.*

ELIGIBLE PROGRAMS

For guidance on other eligible programs for Post-Graduate Certificates and on designing your learning journey with SEELL, please email us at SEELL@aim.edu or visit our website at <https://executiveeducation.aim.edu>
